# Where do I start?

10 Confirm your domain 

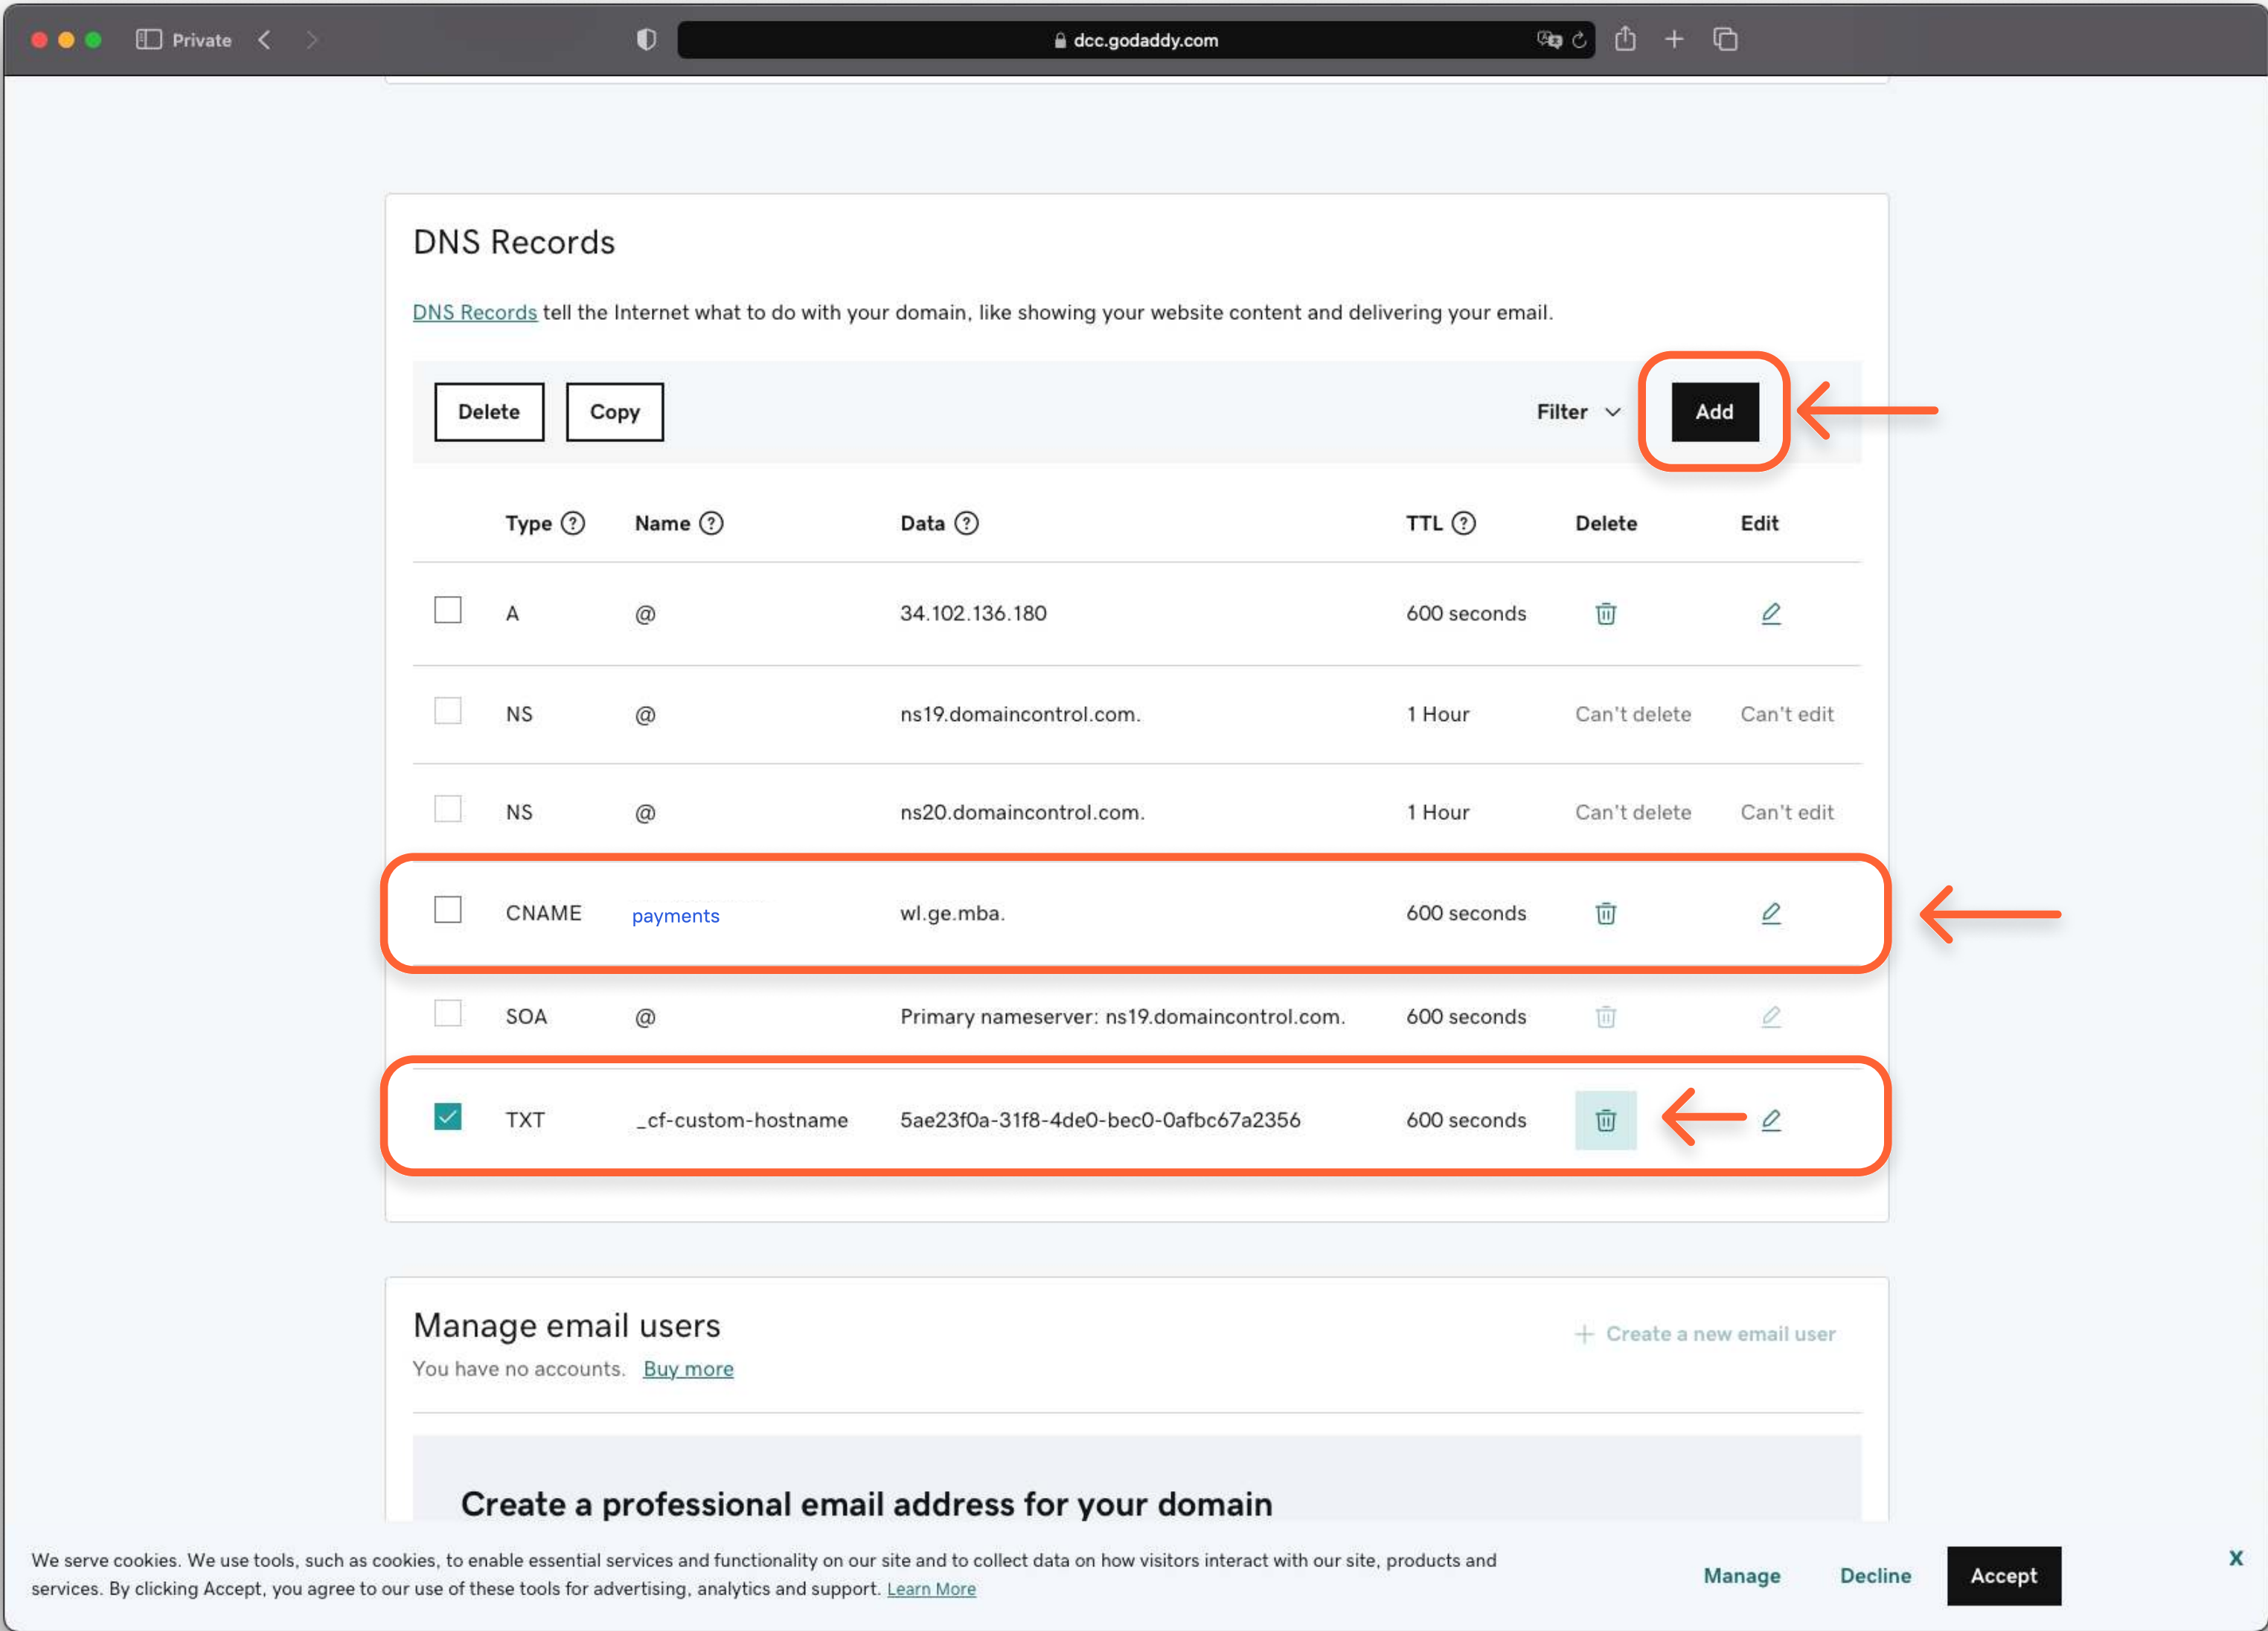

Set up a **CNAME**  record

in your **DNS** 

& **DELETE** **TXT** Record 

Record in your domain registration setting 

And follow the next instruction on your WL Account

# Ready to Start!

- 11 When your domain is **Ready** ●  
You must submit a short name for your app, it will be used for SMS and email notifications.

And just click "**Save**"

You can also **Disable Custom notifications** for your clients.

Just check it and click "**Update**"

The screenshot shows the 'Setup your domain' page in the my.ge.mba interface. The page has a sidebar on the left with various navigation options: Accounts, Statement, Payments, Templates, Operation history, Messages, Signed message, White Label Gemba, Enable & settings, Colors, Fonts, Images, Send invitations, Agent report, OTP/MAC Keys, Tariffs, OpenAPI, and Log out. The main content area is titled 'Setup your domain'. It shows the domain status as 'Ready' with a green dot. Below this, there are two input fields: 'Domain name' with the value 'payments.bank.com' and 'Short name' with the value 'The Chain Bank'. Both fields are highlighted with a red box and an arrow. Below these fields is an 'HTML Template' section with a text area for entering the template. At the bottom, there is a checkbox labeled 'Disable custom notifications' and two buttons: 'DISABLE' and 'UPDATE'. Both buttons are highlighted with a red box and an arrow.

List of recipients can be loaded from file with comma separated values (csv) or Excel Workbook (xlsx).  
First (row #1) line of the file should contain names of columns in any order. Headers must correspond to field values in lines below.  
Column names are: "name", "email".

You can use HTML tags in the mail body to format your message.  
Use placeholder @name to insert recipient's name into subject and body of your message.  
Use your WL domain name <https://bank.thechain.work/> in the message body to invite clients to your WL site.
